

Secondary Data:

How to Find it, How to Use it,
& Why It's Important

Starr Hoffman

Head, Government Documents

UNT Libraries

Introduction

- secondary data:
 - data gathered by government agencies & other organizations
- variety of topics
- all educational levels
- much is accessible online
 - PDF, CSV, XLS, DOC, etc.

Benefits of Secondary Data Analysis

- save time, expense
- larger databases
- longitudinal data
- produces relevant, practical research
- useful for practitioners, policy-makers
- replication

Things to Think About...

- methodology
- limitations
- purpose
- audience
- documentation
- data modification
- accessibility

How to Use Secondary Data

- class assignments
- practice statistical analyses
- replicate research studies (publication)
- longitudinal studies

Sources for Secondary Data: Where to Start?

- use the “Agency Approach”
 - what government agencies or private organizations would use this data?
- good places to start looking...

Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education.

UNT Libraries' *Statistical Resources Guide*

- <http://www.library.unt.edu/govinfo/browse-topics/statistics>

The screenshot shows the UNT Libraries' Statistical Resources Guide website. The header features the UNT Libraries logo with the tagline "The power of ideas starts here." and a navigation bar with links to Library Catalog, Electronic Resources, Digital Collections, and This Website. A search bar is prominently displayed. The main content area is titled "Statistical Resources" and includes a breadcrumb trail: Home > Government Information Connection® > Browse Topics > Statistical Resources. The page describes major sources of national, state, local, foreign, and international statistical data. It lists three categories: Indexes to Statistical Sources, United States Statistics: General Compilations, and United States Statistics by Topic, each with a brief description and a "More Info..." link. A sidebar on the left contains links to various library services, and a right sidebar offers options like "Ask Us" and "Special Audiences".

Data.gov Catalogs

Use the Data.gov catalog below to access U.S. Federal Executive Branch datasets. Click on the name of a dataset to view additional metadata for that dataset. By accessing the data catalogs, you agree to the [Data Policy](#). Data.gov offers data in three ways: through the "raw" data catalog, using tools and through the geodata catalog. The "Raw" Data Catalog provides an instant download of machine readable, platform-independent datasets while the Tools Catalog provides hyperlinks which may lead to agency tools or agency web pages that allow you to mine datasets.

Chapter 1. Elementary and Secondary Mathematics and Science Education

Highlights

- Student Learning in Mathematics and Science
- Teachers of Mathematics and Science
- Instructional Technology in Education
- Transition to Higher Education

Student Learning in Mathematics and Science

Initial disparities in mathematics skills found in the Early Childhood Longitudinal Study, Kindergarten Class of 1999 (ECLS-K), tended to grow as these students progressed through grade 8.

- Kindergarten test scores, along with many demographic characteristics, were strong predictors of students' skills in 2007, after 9 years of schooling. Gaps generally grew through about grade 3 and thereafter remained stable, with some narrowing marginally.
- Science understanding was tested in grades 3, 5, and 8; gaps between more and less advantaged groups stayed about the same over these grades.

Scores on the National Assessment of Educational Progress (NAEP) mathematics test increased among younger students through 2008, continuing a steadily rising pattern since 1990.

- From 1990 to 2007, fourth graders gained 27 points and eighth graders gained 19 points (on a scale of 0–500 for both grades).
- These increases in performance were shared by boys and girls; white, black, and Hispanic students; and students

Welcome to StateMaster, a unique statistical database which allows you to research and compare a multitude of different data on US states. We have compiled information from various primary sources such as the US Census Bureau, the FBI, and the National Center for Educational Statistics. More than just a mere collection of various data, StateMaster goes beyond the numbers to provide you with visualization technology like pie charts, maps, graphs and scatterplots. We also have thousands of map and flag images, state profiles, and correlations.

We have stats on everything from toothless residents to percentage of carpools. Our database is increasing all the time, so be sure to check back with us regularly.

If you are interested in data on an international scale, be sure to check out NationMaster, our sister site and the world's largest central

Window on State Government: Compendium of Texas Socioeconomic Data

- <http://www.window.state.tx.us/ecodata/compendium/>
 - community colleges
 - other institutions of higher education

The screenshot shows the 'Window on State Government' website, specifically the 'Compendium of Texas Socioeconomic Data' page. The header includes the site logo, the name 'Susan Combs Texas Comptroller of Public Accounts', and links for 'Páginas en español' and 'Contact Us'. A 'Site Search' bar is present. Below the header is a navigation menu with links: HOME, ABOUT US, TEXAS TAXES, EDUCATION, FINANCES & ECONOMY, STATE PURCHASING, FORMS, e-SERVICES, and a 'Quick Start for:' section with buttons for Citizens, Business, and Government. The main content area is titled 'Compendium of Texas Socioeconomic Data' and features a 'Texas Finances' link. It is divided into two sections: 'Cities' and 'Counties'. The 'Cities' section, updated April 18, 2008, mentions a 'city file (xls)' with 29 data elements for 1,203 Texas cities and lists: Population, Employment and Unemployment, and Taxable Sales, Sales Tax Allocations and Sales Tax Rate Changes. The 'Counties' section, updated April 25, 2008, mentions a 'county file (xls)' with 58 data elements for each of Texas' 254 counties and lists: Population, Employment and Unemployment, Personal Income, Agricultural Cash Receipts, Oil and Gas Production and Well Counts, Taxable Sales, Sales Tax Allocations and Sales Tax Rate Changes, Property Values, State Expenditures, and Community Colleges and Institutions of Higher Education. A definition box on the right explains the term 'compendium' as a collection of concise but detailed information about a particular subject, systematically gathered, citing the Oxford American Dictionaries.
